

Grant Services

The funding environment is tighter than ever.

The New Growth Group, LLC offers comprehensive grant development and management services. Our goal is to provide customizable support for our clients' varied grant-related needs.

- Forecasting and Market Research. New Growth scours the grants universe to provide customized information on grant opportunities to clients. And, we work to improve our clients' connectivity to networks of strategic partners like philanthropies and consultants that expand exposure to funding opportunities.
- Selection and Staging. We help clients decide which grants to pursue in support of their strategic goals. In some cases, this involves establishing decision-making policies and processes. And, we work to prepare project concepts aligned with the priorities of funders. As needed, we assess client readiness to receive and administer grant funding.
- Grant writing or editing. New Growth can serve as the primary writer, process manager, or editor.
- Grant management. We staff or manage projects during start-up or sunset phases of grant-funded projects when staffing is most challenging. This includes budget management and modification processes, performance management, report and deliverable development, or general project staffing roles.
- Compliance assistance. New Growth helps clients comply with funder requirements such as record keeping, reporting and documentation, budgeting, regulatory compliance, and renewal applications.
- Evaluation. New Growth conducts independent third-party evaluations measuring project impact and capturing implementation. Our team includes full-range statistical and analytical services.
